- ICC profiles explained
- Generic vs custom ICC profiles
- Printer problems and solutions
- Test printing and monochrome print settings
- Using PermaJet paper

There will be special offers available on the day through 42 Limited

Equipment needed

None.

Testimonials

"After buying a fantastic Canon printer from the lovely people at The Imaging Warehouse in Stratford-upon-Avon at the Photography Show this year I thought it best to take one of their courses to get a better idea of how different papers compliment different styles of photography and how to best print my work. Well after a few dodgy prints and getting very frustrated I waited until the course to do any more printing... Well I learnt so much and I now have a far better understanding on prints with specific paper from PermaJet. Can't thank them enough for putting on these courses I most certainly will be doing another one!! The paper is stunning who knew it would make such a difference!" —*Joanna Wood, Fair Lady Photography*
